A bar chart showing the coefficient of standard deviation (csd) on the y-axis against the number of components (Cp) on the x-axis. The y-axis has major ticks at 0.0000, 0.0010, and 0.0020. The x-axis has labels for Cp values 1, 3, 5, 7, 9, 11, 13, 15, 17, 19, and 21. There are 21 bars in total, each representing a Cp value from 1 to 21. The bars are orange with black outlines. Each bar has a black horizontal line indicating the mean and black dashed vertical lines indicating the error bars. The mean csd value starts at approximately 0.0007 for Cp=1 and decreases to approximately 0.0004 for Cp=21. The error bars are largest for Cp=1 and decrease as Cp increases.
