

[illegible]

A box plot showing the distribution of  $csd$  for different values of  $C_p$  (1, 3, 5, 7, 9, 11, 13, 15, 17, 19, 21). The y-axis is labeled  $csd$  and ranges from 0.0000 to 0.00020. The x-axis is labeled  $C_p$ . The plot shows that the median  $csd$  is approximately 0.00005 for all  $C_p$  values, and the interquartile range is very narrow, indicating high consistency across the different  $C_p$  values.
