

[illegible]

Box plot showing the coefficient of standard deviation (csd) for different values of C_p (1, 3, 5, 7, 9, 11, 13, 15, 17, 19, 21). The y-axis represents csd, ranging from 0e+00 to 6e-04. The plot shows that the median csd is relatively stable around 2e-04, while the interquartile range and whiskers decrease as C_p increases.
