

[illegible]

Box plot showing the distribution of  $csd$  (Y-axis) across different values of  $C_p$  (X-axis, ranging from 1 to 21). The Y-axis ranges from  $0e+00$  to  $4e-04$ . The plot displays 21 box plots, each representing a different  $C_p$  value. The median values are relatively stable around  $1.5e-04$ , while the whiskers show a slight downward trend as  $C_p$  increases.
