

[illegible]

Box plot showing the distribution of  $csd$  (Y-axis, ranging from 0.0000 to 0.0025) across different values of  $C_p$  (X-axis, ranging from 1 to 21). The plot displays the median (black horizontal line within the box), the interquartile range (orange box), and the range (dashed whiskers) of the data for each  $C_p$  value. The median  $csd$  is consistently around 0.0005, while the range of  $csd$  values decreases as  $C_p$  increases.
