

[illegible]

A box plot showing the distribution of  $csd$  for different values of  $C_p$  (1, 3, 5, 7, 9, 11, 13, 15, 17, 19, 21). The y-axis represents  $csd$  and ranges from 0.00000 to 0.00030. The x-axis represents  $C_p$ . The plot shows that the median  $csd$  is relatively stable across different  $C_p$  values, around 0.00008. The interquartile range (IQR) is also stable, spanning from approximately 0.00003 to 0.00014. Whiskers extend from approximately 0.00001 to 0.00029. There are no outliers.
