Box plot showing the distribution of the coefficient of standard deviation (csd) for different values of  $C_p$  (1, 3, 5, 7, 9, 11, 13, 15, 17, 19, 21). The y-axis represents csd, ranging from 0.00000 to 0.00030. The x-axis represents  $C_p$ . The plot shows that the median csd is approximately 0.00008 for all  $C_p$  values, and the interquartile range (IQR) is approximately 0.00004. The whiskers extend from approximately 0.00002 to 0.00016. The outliers are approximately 0.00028.
