

[illegible]

A box plot showing the distribution of csd for different values of C_p (1, 3, 5, 7, 9, 11, 13, 15, 17, 19, 21). The y-axis is labeled csd and ranges from 0.00000 to 0.00020. The x-axis is labeled C_p . The plot shows that the median csd is relatively stable across different C_p values, while the variance (indicated by the length of the whiskers) decreases as C_p increases.
