

[illegible]

Box plot showing the distribution of  $csd$  (Y-axis) across different values of  $C_p$  (X-axis, ranging from 1 to 21). The Y-axis ranges from  $0e+00$  to  $6e-04$ . The plot displays the median, quartiles, and range (whiskers) for each  $C_p$  value. The distributions are generally stable, with medians around  $1.8e-04$  and upper whiskers extending towards  $6e-04$ .
