A box plot showing the distribution of csd for different values of C_p (1, 3, 5, 7, 9, 11, 13, 15, 17, 19, 21). The y-axis is labeled csd and ranges from 0.0000 to 0.0020. The x-axis is labeled C_p . The plot shows that as C_p increases, the median csd decreases slightly, and the spread (interquartile range and whiskers) also decreases.
