

[illegible]

A box plot showing the distribution of CSD (Covariance Score Difference) for different values of C_p (1, 3, 5, 7, 9, 11, 13, 15, 17, 19, 21). The y-axis represents CSD, ranging from 0.0000 to 0.0012. The x-axis represents C_p . The plot shows that the median CSD is relatively stable around 0.0002, while the spread (interquartile range and whiskers) decreases as C_p increases.
