

[illegible]

Box plot showing the distribution of CSD values for 21 Cp sites. The y-axis represents the CSD value, ranging from 0.00000 to 0.00020. The x-axis represents the Cp sites, numbered 1 through 21. The plot displays the median (black line), quartiles (orange box), and range (dashed whiskers) for each site. The median values are consistently low, around 0.00005, and the range of values is narrow, spanning from approximately 0.00000 to 0.00019.
