A box plot showing the distribution of csd for different values of C_p (1, 3, 5, 7, 9, 11, 13, 15, 17, 19, 21). The y-axis is labeled csd and ranges from 0.00000 to 0.00015. The x-axis is labeled C_p . The plot shows that the median csd is approximately 0.00005 for all C_p values, and the distribution is relatively stable across the range of C_p .
