

[illegible]

Box plot showing the distribution of csd (Y-axis) for different values of C_p (X-axis, ranging from 1 to 21). The Y-axis ranges from 0.0000 to 0.0012. The plot displays the median (black line), quartiles (orange box), and range (dashed whiskers) of csd for each C_p value. The median csd remains relatively stable around 0.00025, while the upper whiskers show a decreasing trend as C_p increases.
