

[illegible]

A box plot showing the distribution of CSD (Coefficient of Skewness Deviation) for different values of  $C_p$  (1 to 21). The y-axis represents CSD, ranging from 0e+00 to 1e-03. The x-axis represents  $C_p$ , with values 1, 3, 5, 7, 9, 11, 13, 15, 17, 19, and 21. The plot shows that as  $C_p$  increases, the median CSD decreases, and the spread of the data (indicated by the whiskers) also decreases.

$C_p$	Median CSD	Q1 CSD	Q3 CSD	Min CSD	Max CSD
1	~0.00025	~0.00010	~0.00045	~0.00005	~0.00105
3	~0.00024	~0.00010	~0.00044	~0.00005	~0.00095
5	~0.00023	~0.00010	~0.00043	~0.00005	~0.00090
7	~0.00022	~0.00010	~0.00042	~0.00005	~0.00085
9	~0.00021	~0.00010	~0.00041	~0.00005	~0.00080
11	~0.00020	~0.00010	~0.00040	~0.00005	~0.00075
13	~0.00019	~0.00010	~0.00039	~0.00005	~0.00070
15	~0.00018	~0.00010	~0.00038	~0.00005	~0.00065
17	~0.00017	~0.00010	~0.00037	~0.00005	~0.00060
19	~0.00016	~0.00010	~0.00036	~0.00005	~0.00055
21	~0.00015	~0.00010	~0.00035	~0.00005	~0.00050
