

[illegible]

A box plot showing the distribution of csd for different values of C_p (1, 3, 5, 7, 9, 11, 13, 15, 17, 19, 21). The y-axis is labeled csd and ranges from 0.00000 to 0.00020. The x-axis is labeled C_p . The plot shows that the median csd is relatively stable across all C_p values, around 0.00006. The interquartile range (IQR) is also stable, spanning from approximately 0.00002 to 0.00010. The whiskers extend from approximately 0.00001 to 0.00021. There are no outliers.
