

[illegible]

A box plot showing the distribution of the coefficient of standard deviation (csd) for various values of the parameter C_p . The x-axis, labeled C_p , has values from 1 to 21 in increments of 2. The y-axis, labeled csd , ranges from 0.000 to 0.003. Each box represents the interquartile range (IQR) of the data, with a horizontal line indicating the median. The whiskers extend to the minimum and maximum values of the data. As C_p increases, the median csd decreases, and the overall spread of the data (the length of the boxes and whiskers) also decreases, indicating a more stable and consistent result.

C_p	Median csd	Q1 csd	Q3 csd	Min csd	Max csd
1	0.0008	0.0003	0.0016	0.0000	0.0035
2	0.0008	0.0003	0.0015	0.0000	0.0033
3	0.0008	0.0003	0.0015	0.0000	0.0032
4	0.0008	0.0003	0.0014	0.0000	0.0031
5	0.0008	0.0003	0.0014	0.0000	0.0030
6	0.0008	0.0003	0.0014	0.0000	0.0029
7	0.0008	0.0003	0.0014	0.0000	0.0028
