

[illegible]

Figure 10 is a box plot showing the distribution of the coefficient of determination (C_{sd}) for different values of the parameter C_p (1, 3, 5, 7, 9, 11, 13, 15, 17, 19, 21). The y-axis represents C_{sd} , ranging from 0.00000 to 0.00015. The x-axis represents C_p . The plot shows that the median C_{sd} is approximately 0.00004 for all C_p values, and the distribution is relatively stable across the range of C_p values.
