

[illegible]

Box plot showing the distribution of csd (Y-axis) for different values of C_p (X-axis). The Y-axis ranges from 0.0000 to 0.0015. The X-axis values are 1, 3, 5, 7, 9, 11, 13, 15, 17, 19, 21. The plot displays the median (black line), quartiles (orange box), and range (dashed whiskers) of csd for each C_p value.
