

[illegible]

A bar chart showing the standard deviation (csd) of the estimated mean for different values of  $C_p$ . The y-axis is labeled 'csd' and ranges from 0.000 to 0.012. The x-axis is labeled 'Cp' and ranges from 1 to 21. The bars are orange with black outlines. The standard deviation decreases as  $C_p$  increases.

Cp	csd (approx.)
1	0.0065
2	0.0062
3	0.0060
4	0.0058
5	0.0056
6	0.0055
7	0.0054
8	0.0053
9	0.0052
10	0.0051
11	0.0050
12	0.0049
13	0.0048
14	0.0047
15	0.0046
16	0.0045
17	0.0044
18	0.0043
19	0.0042
20	0.0041
21	0.0040
