

[illegible]

A bar chart showing the standard deviation (csd) of the estimated parameters for different values of  $C_p$ . The y-axis is labeled 'csd' and ranges from 0e+00 to 1e-03. The x-axis is labeled 'Cp' and ranges from 1 to 21. The bars are orange with black outlines. The standard deviation decreases as  $C_p$  increases.

$C_p$	csd (approx.)
