

[illegible]

Box plot showing the distribution of  $csd$  (Y-axis, ranging from  $0e+00$  to  $4e-04$ ) across different values of  $C_p$  (X-axis, ranging from 1 to 21). The plot displays the median, quartiles, and range (whiskers) for each  $C_p$  value. The median  $csd$  is relatively stable around  $1.5e-04$  across all  $C_p$  values. The range of  $csd$  values is wider for lower  $C_p$  values and narrows slightly as  $C_p$  increases.
