

- calcium ion transmembrane transporter activity
- calcium channel activity
- cation channel activity
- gated channel activity
- gated nucleotide exchange factor activity
- ion channel activity
- ion-gated channel activity
- ligand-gated action channel activity
- metal ion transmembrane transporter activity
- the guanyl-nucleotide exchange factor activity
- signal transducer activity, downstream of receptor
- substrate-specific channel activity
- transmembrane receptor protein kinase activity
- transmembrane receptor protein tyrosine kinase activity
- voltage-gated cation channel activity
- voltage-gated channel activity
- voltage-gated ion channel activity
- GTPase activity
- actin binding
- calmodulin binding
- glucocorticoid binding
- histone binding
- regulation ion binding
- MMP kinase kinase kinase activity
- microtubule motor activity
- phosphatase activity
- phospholipid binding
- phosphoprotein phosphatase activity
- phosphoserine/threonine activity
- protein-tyrosine kinase activity
- protein tyrosine kinase activity
- Rho guanyl-nucleotide exchange factor activity
- signal transducer, downstream of receptor, with serine/threonine kinase activity
- channel regulator activity
- channel activity
- delayed rectifier potassium channel activity
- extracellular ligand-gated ion channel activity
- extracellular glutamate-gated ion channel activity
- GABA receptor activity
- GABA-A receptor activity
- GABA-gated chloride ion channel activity
- glutamate receptor activity
- GTPase activator activity
- GTPase regulator activity
- inhibitory extracellular ligand-gated ion channel activity
- ionotropic glutamate binding
- ionotropic glutamate receptor activity
- ligand-gated channel activity
- ligand-gated ion channel activity
- monovalent inorganic cation transmembrane transporter activity
- neurotransmitter receptor activity
- neurotransmitter receptor activity involved in regulation of postsynaptic membrane
- nucleotide triphosphatase regulator activity
- select rectifier potassium channel activity
- passive transmembrane transporter activity
- postsynaptic neurotransmitter receptor activity
- potassium channel activity
- potassium ion transmembrane transporter activity
- R-SMAC binding
- transcription factor activity, RNA polymerase II distal enhancer sequence-specific
- transcription factor activity, RNA polymerase II proximal promoter sequence-specific
- transcriptional repressor activity, RNA polymerase II proximal promoter sequence-specific
- transcriptional repressor activity, RNA polymerase II transcription regulatory region
- transmitter-gated channel activity
- transmitter-gated ion channel activity
- transmitter-gated ion channel activity involved in regulation of postsynaptic membrane
- voltage-gated potassium channel activity
- phosphatidylinositol 3-OH kinase binding
