

[illegible]

A box plot showing the distribution of CSD (Covariance Score Distance) for 21 samples. The y-axis is labeled 'csd' and ranges from 0.00000 to 0.00015. The x-axis is labeled 'Cp' and shows sample numbers 1, 3, 5, 7, 9, 11, 13, 15, 17, 19, and 21. Each box represents the interquartile range (IQR) of the CSD values for a given sample. The median is indicated by a horizontal line within each box. Whiskers extend to the minimum and maximum values of the data for each sample. The distributions are very similar across all samples, with medians clustered around 0.00004 and IQRs spanning from approximately 0.00002 to 0.00008.
