A bar chart showing the coefficient of standard deviation (csd) for different values of C_p (1 to 21). The y-axis is labeled 'csd' and ranges from 0e+00 to 8e-05. The x-axis is labeled 'Cp' and ranges from 1 to 21. The bars are orange with black outlines. The height of the bars decreases slightly as C_p increases, starting around 4e-05 for $C_p=1$ and ending around 3.5e-05 for $C_p=21$. Each bar has a dashed vertical line extending upwards to a horizontal tick mark at 8e-05.
