

[illegible]

A box plot showing the distribution of CSD (Covariance Score Difference) for different values of C_p . The x-axis is labeled C_p and has values 1, 3, 5, 7, 9, 11, 13, 15, 17, 19, 21. The y-axis is labeled 'csd' and ranges from 0.0000 to 0.0025. The plot shows 11 orange box plots with black whiskers, indicating a decreasing trend in CSD as C_p increases.
